

sepax cell separation system sepax 2 s 100 - sepax cell separation system sepax 2 s 100 product 14000 the sepax 2 s 100 is a mobile closed capability system that efficiently processes umbilical cord blood bone marrow peripheral blood or other blood derivatives as permitted by applicable regulatory requirements the fundamental scientific technology relies on a separation chamber that, **sepax 2 cell processing device tk biotech** - sepax technology sepax 2 cell processing device sepax 2 is the new generation of sepax technology for automated adult stem cell processing this mobile closed capability system efficiently processes umbilical cord blood bone marrow peripheral blood or other blood like material as permitted by applicable, **sepax polyrp column manual** - toll free 1 877 sepax us www sepax tech com sepax polyrp column manual column information polyrp resins have been specifically designed for hydrophobic 0 2 4 6 8 10 12 14 1 2 3 au 0 00 0 02 0 04 0 06 0 08 0 10 0 12 0 14 0 16 0 18 0 20 min 0 2 4 6 8 10 12 14 au 0 00 0 02 unless a user has special purpose to reverse the flow direction, **sepax 2 s 100 ge healthcare biosafe** - download pdf product 14000 the sepax 2 s 100 is a mobile closed capability system that efficiently processes umbilical cord blood bone marrow peripheral blood or other blood derivatives as permitted by applicable regulatory requirements, **sepax protocol software neatcell biosafe** - sepax protocol software neatcell product 14300 our protocol software provides a fully automated method to separate cellular product into its components in combination with our sepax cell separation system it enables a reproducible and user independent procedure, **sepax cell separation system biosafe** - sepax cell separation system the sepax 2 s 100 is a mobile closed capability system that efficiently processes umbilical cord blood bone marrow peripheral blood or other blood derivatives as permitted by applicable regulatory requirements, **cellwash ge healthcare biosafe** - it enables a reproducible and user independent procedure cellwash package includes both smartwash and cordwash protocols smartwash protocol is designed for washing peripheral blood stem cells and bone marrow while cordwash protocol is dedicated to wash umbilical cord blood , **srt sec 1000 sepax technologies inc** - srt sec column manual column information utilizing proprietary surface technologies sepax srt sec phases are made of uniform hydrophilic and neutral nanometer thick films chemically bonded on high purity and enhanced mechanical stability silica the sepax proprietary surface, **ge healthcare life sciences** - biosafe website featuring the sefia sepax 2 and the smart max, **scanpal 2 user manual 02 26 02 barcode discount** - scanpal 2 the content of this manual is the property of metrologic instruments inc the information contained in this manual has been carefully checked and is considered to be accurate for further details see the application generator user manual, **sepax c pro cell processing system** - sepax c pro cell processing system the sepax c pro cell processing system is an automated and functionally closed technology developed for cell processing when manufacturing cell therapy products it combines exclusively with sepax c pro software protocols and kits to process cellular products, **srt sec column manual sigma aldrich** - srt sec column manual column information utilizing proprietary surface technologies sepax srt sec phases are made of uniform hydrophilic and neutral nanometer thick films chemically bonded on high purity and enhanced mechanical stability silica the sepax proprietary surface technologies allow the chemistry of thin film formation to be well, **sepax technologies inc manufactured by sepax** - 2 3 5 10 15 25 and 30 cm length sepax also offers custom made columns technical specifications proteomix phases scx np1 7 3 5 10 and scx por10 unless a user has special purpose to reverse the flow direction for example removal of the inlet pluggage follow the flow, **sepax usermanual electromagnetic compatibility radio** - step 2 sepax parameter setting in order to reduce the time between the thawing of the input product and the beginning of the washing procedure we recommend setting the parameters of the protocol ready please check the chapter 4e of the operator manual for more details about parameter selection, **sepax technologies inc sigma aldrich** - srt c sec column user manual column information utilizing proprietary surface technologies and 5 pm particle size srt c sec phases are made of uniform hydrophilic and neutral nanometer thick films chemically bonded on the high purity and enhanced mechanical stability silica the proprietary, **sepax c pro ge healthcare biosafe** - the sepax c pro cell processing system is an automated and functionally closed technology developed for cell processing when manufacturing cell therapy products it combines exclusively with sepax c pro software protocols and kits to process cellular products, **sepax cell separation system and single use kits sepax 2** - the sepax 2 is the modified version of the sepax main processing unit labelling operator manual describes the procedures steps and the machine use the operator manual has been revised to include the new user interface device external design original design modification modernized housing shape user interface two lines lcd display, **sepax c pro protocol software culturewash c pro** - sepax c pro protocol software culturewash c pro product 29264736 wash higher volumes must be validated by the user 1 prepare a washing solution 2 prepare a single use kit with

the initial product 3 install the kit on the sepax c pro 4 the sepax c pro automatically performs the procedure including primary dilution, **sepax 2 stemcells processing video** - sepax 2 stemcells processing video stemcells genomics loading unsubscribe from stemcells genomics cancel unsubscribe working subscribe subscribed unsubscribe 3 loading, **sepax 2 versus other processing methods cordlife** - sepax 2 versus other processing methods 0 100 80 60 40 total nucleated cell recovery rate 20 automated closed system sepax 2 up to 99 46 manual closed system triple bag, **zenix c 300 c 300 zenix c 150 wolfson centre home page** - sepax technologies inc 1 phone 302 366 zenix c sec column user manual column information utilizing proprietary surface technologies and 3 m particle size zenix c sec phases are made of uniform hydrophilic and neutral nanometer thick films chemically bonded on the high purity and enhanced mechanical stability silica, **sepax technologies gp c18 manual sepax 2** - sepax s100 sepax 2 it is a cell separator fully automatic closed loop and sterile it allows a complete and efficient separation of cord blood peripheral blood and bone marrow by centrifugation and subsequent division of blood components through optical sensors, **cell isolation ge healthcare life sciences** - manual cell isolation and enrichment methods can be time consuming imprecise and prone to contamination to address these concerns choose automated and functionally closed technologies such as ge healthcare life sciences sepax c pro and sefia systems, **sepax protocol software smartredux biosafe** - sepax protocol software smartredux product 14301 our protocol software provides a fully automated method to separate cellular product into its components in combination with our sepax cell separation system it enables a reproducible and user independent procedure, **sepax polyrp column manual** - sepax polyrp column manual column information 0 2 4 6 8 10 12 14 1 2 3 figure 1 a test chromatogram of a polyrp 300 column 10 m 300 7 8x300mm column temperature ambient unless a user has special purpose to reverse the flow direction for example, **qualitative and quantitative cell recovery in umbilical** - qualitative and quantitative cell recovery in umbilical cord blood processed by two automated devices in routine cord sepax and axp are automated systems specifically developed for umbilical cord blood these are preferred to manual methods because of better standardisation and reproducibility and less influence from the, **user manual sigma aldrich** - search results for user manual at sigma aldrich, **gp c8 and bio c8 column manual sepax langye net** - including buffers should be filtered through 0 45 m or 0 2 m filters before use sepaxgp c8 and bio c8 bonded stationary phase is nonpolar in nature it is recommended that the mobile phase be a mixture of organic solvent microsoft word user manual gp c8 bio c8, **proteomix ion exchange phases** - bed thirdly sepax s proprietary technology synthesizes a uniform and densely packed layer of ion exchange functional groups such uniquely designed proteomix scx np wcx np sax np and wax np phases offer the highest resolution and efficiency separations for proteins oligonucleotides carbohydrates and peptides figure 2 is a typical test, **sepax c pro protocol software pericell c pro** - 2 install the kit on the sepax c pro 3 the sepax c pro automatically performs the procedure 4 collect concentrated protocol software is integral to our sepax c pro cell processing system it allows for an automatic reproducible and user independent procedure only for use with compatible sepax c pro equipment compatible equipment sepax, **polar mc hic media hebrew university of jerusalem** - sepax technologies inc customer service 877 sepax us www sepax tech com polar mc hic media hydrophobic interaction chromatography media product description polar mc chromatographic media is composed of hydrophilic ph 2 14 available from grams to multi kilogram high pressure limit, **biosafe sepax manuals carol romine** - download download biosafe sepax manuals read online read online biosafe sepax manuals sepax biosafe biosafe sepax kitsbiosafe sepax c pro sepax neatcell ge sepax biosafe ge smartmax biosafe sepax c pro user manual 11 jan 2019 manual processing is when cord blood is handled in the laboratory by the sepax 2 made by biosafe or the axp made by cesca therapeutics 21 jul 2017 autoxpress, **sepax technologies inc delaware technology park** - user manual sepax opalshell c18 column column information sepax opalshell c18 columns use a core shell bonded silica stationary phase that has a solid silica core and a porous silica outer layer the c18 functional group is applied to the porous outer layer, **srt sec column manual analytikbedarf de** - srt sec column manual column information utilizing proprietary surface technologies sepax srt sec phases are made of the uniform hydrophilic and neutral nanometer thick films chemically bonded on the high purity and enhanced mechanical stability silica the sepax proprietary surface technologies allow the chemistry of thin film formation, **sepax c pro protocol software culturewash c pro** - 2 prepare a single use kit with the initial product 3 install the kit on the sepax c pro 4 the sepax c pro automatically performs the procedure including primary dilution osmolarity balancing sedimentation and initial product rinsing supernatant extraction cell resuspension cell extraction into a final product bag, **sepax technologies inc analytikbedarf de** - sepaxhp cyano column manual column information unless a user has special purpose to reverse the flow direction for example including buffers should be filtered through 0 45 m or 0 2 m filters before use sepaxhp cyano bonded stationary phase has, **sepax c pro protocol software beadwash c pro** - sepax

*c pro protocol software beadwash c pro performance depends on user product configuration workflow step details 1 prepare a washing solution 2 prepare a single use kit with the initial product 3 install the kit on the sepax c pro 4 the sepax c pro automatically performs the procedure including primary dilution, **proteomix sepax hplc columns products** - a breakthrough technology of achieving combined high ion exchange capacity and high resolution for the non porous resins with the particle size selection of 1 7 3 5 and 10 m proteomix ion exchange phases are specially designed for high resolution high efficiency and high recovery separations of proteins oligonucleotides and peptides*
